About Us

R&R Mechanical Services (RRMS) opened for business in 2008 when its owners acknowledged there was a need in the growing Hispanic population for an HVAC company that would cater to them. Rolando Ramos founded the company and began conducting business out of his shed; Three years later his brother Ruben joined him in the ownership of the business. Today RRMS offers exceptional sales, service and installation of heating, ventilation, air conditioning and refrigeration to thousands of customers in the west Michigan area. RRMS currently employs upwards of 40 HVAC/R professionals from within our community.

We continue to cultivate long-term relationships in the residential and commercial sectors because we are committed to delivering exceptional comfort solutions to our customers.
