Concept Design

Streets account for the biggest percentage of public space in our City and construction presents an opportunity to change a street's design to serve all users.

The design described below was decided upon based on the guidance and recommendations in the City's Vital Streets Plan and Bicycle Action Plan.

The project will:

- Place new water main and replace lead water service lines.
- Reconstruct the street, curb, and gutter.
- Upgrade sidewalks and ramps to meet the Americans with Disabilities Act standards.
- Install raised separated bicycle lanes on both sides of the street.
- Remove the on-street parking lane.
- Plant new street trees.
- Replace all driveway approaches.

Business Guide

As we work to improve the street, we understand that businesses are sensitive to construction. For this reason, we've created a guide containing information for businesses during construction. Please find this guide on our website or contact us to have a copy sent to you.

Persons needing accommodations for effective meeting participation should contact Community Engagement no later than one week in advance to request mobility, visual, hearing, interpretive, or other assistance.
