### Project Info

The design described below was decided upon based on the guidance and recommendations in the City's Vital Streets Plan.

### Tentative Construction Schedule

2025

The project will:

- Remove and repave the road surface.
- Replace driveway approaches as needed.
- Plant new street trees.
- Install sidewalk on the north side of the street on City property. This will fill in gaps in the sidewalk network and provide transportation choices for people.
  - If you have signs, lighting, plants, landscaping, etc. in the parkway you want to save, please move them prior to the start of construction. The parkway is the City's property between the street and private property.
  - Some trees will need to be removed.
  - Please visit our website to see a visual of the sidewalk location.

After the project is complete, property owners are required to:

- Clear sidewalks within 24 hours from the time it stops snowing.
- Maintain the parkway. The parkway is the area between the sidewalks and road.

Prior to construction starting, we will send another mailer with construction details and the project schedule. Please visit our website above and search *Michigan* for more information.

### Business Guide

As we work to improve the street, we understand that businesses are sensitive to construction. For this reason, we've created a guide containing information for businesses during construction. Please find this guide on our website or contact us to have a copy sent to you.
